

### **MCS Live Update**

Similar to the other computer software products, MCS Live Update provides automatic updates when the need arises.

### **Scalability**

By utilizing the Distributed Network Entity architecture, MCS is able to allow up to a thousand users to participate in a conference. Parallel environments with constant bandwidth are created for both information and data processing.

### **Optional component**

#### **MCS Accounting Entity**

MCS Accounting (MCSAcct) an add-on component of MCS. It is used to keep a log on the usage of MCS. A report will then be generated to display the usage record in an easy to understand format. Information included in the report can consist of the following:

- User Group and Name
- Login and Log off Dates
- Login and Log off Times
- Source IP

#### **MCS Web Administrative Tool**

The Web Admin Tool is another add-on component of MCS. It allows the administrator to configure MCS remotely through any platform that utilizes Java. By using this tool, administrator is able to perform such tasks as creating new users and groups, editing existing users and group, reconfigure the MCS server and also creating and joining a chat conference.

- Video Conferencing
- Live Presentations
- Multiple Network and OS
- Multiple Sites
