

# System Evolution

# System Evolution: Chronology of Events

- **Development Project Monitoring System (DPMS)**
  - **1994** - Study initiated and carried out
  - **1995** - System was developed and completed
  - Only capture **Project Profile**
  - **Stand alone system** – Information submitted to SPU by agencies using **diskette** similar to **Sistem Maklumat Bersepadu Setia/Siap (SMBSS)** for Federal funded projects.
- **DPMS II**
  - **1996** - Study initiated and carried out
  - **1997** - System was developed and implemented in August
  - Enhancement of DPMS to **include Project Monitoring component**
  - Also **stand alone**, submission of data **via diskettes** and the data need to be uploaded before the information can be viewed. Hence information received was not up-to-date due to **time lapse**. Furthermore, diskette **storage capacity** has **limitation**.

# System Evolution: Chronology of Events

- **DPMS III**

- **November 1999** - Study initiated and carried out
- **2000** - System developed and completed in July
- Application of **web-based technology** using SarawakNet infrastructure
- System comprises of three components - **project profile, project monitoring** and **GIS functionality**
- **November 2000** - Handed over to the State Implementation Monitoring Unit (SIMU) as the custodian of the system
- **10 April 2003** – System renamed to **System for Project Implementation Monitoring (SPIM)** by State Cabinet
- Not customised to cater for **different project types** namely **non-physical projects**

**SIMU** Unit Pemantauan Pelaksanaan Negeri  
Jabatan Ketua Menteri
